I'm a tech enthusiast with a knack for turning code into cool, real-world solutions. Armed with a degree in Computer Science and Engineering and hands-on experience in Python, web development, and AI-powered projects, I thrive on tackling challenges that make a real impact. From e-commerce sites to Telegram bots, I've built digital tools that work and sometimes even surprise. I'm all about teamwork, learning, and pushing boundaries — whether it's debugging a tricky backend issue or brainstorming the next big tech idea. If there's a problem to solve, count me in. And if there's coffee, even better.
